

SPATZ BALLOON STUDY REQUIRED LABS

Please take this list with you when you go to have labs drawn for the implantation of the Spatz Balloon. Show this list to the technician and make sure the following labs have been drawn.

Labs and tests that are required:

- CBC:** Hgb, Hct, WBC, Platelets
- Chemistry panel:** sodium, potassium, BUN, creatinine, glucose, SGOT(AST), SGPT(ALT), alkaline phosphatase, total cholesterol
- TSH**
- H. Pylori IgG Antibody**
- Hemoglobin A1C** (if diabetic)
- Urine pregnancy test** (for women of childbearing age)

These additional tests may be required but will typically be done at a hospital outpatient testing department and not at a freestanding lab:

- EKG** (above the age of 40)
- Chest X-Ray** (above the age of 60)
